PRODUCT & BEST PRACTICE

## HEALTHY AIR AT PEAK TIMES? FEASIBLE.

### WE SHOW YOU HOW TO ENSURE HEALTHY AIR AT PEAK TIMES

We are currently faced with the new task of finding out what is dangerous and what is not, and how to act on the basis of the current data on corona and the risk of infection. Some are looking for answers only for themselves, others have to take responsibility for an entire staff or school.

### IMPROVED AIR QUALITY DUE TO CONTROLLED VENTILATION

What can proper ventilation in offices, schools and living spaces do for our health?  
We inform you and offer solutions.

## THE SOLUTION: SINGLE-ROOM VENTILATION UNITS FOR EASY RETROFITTING

### VARIANT I:

Up to an air volume of 1200 m<sup>3</sup>: The CIVIC series EC DB/LB is ideal for large offices and school classes.

Wherever people get together indoors, sufficient fresh air must be provided, especially now. Pure circulation and filtering of the room air is not sufficient to improve the O<sub>2</sub>/CO<sub>2</sub> level. Single-room ventilation systems ensure the removal of used air and the supply of fresh air.

### VARIANT II and III:

Applicable for smaller rooms: Freshbox and Vento Experts  
Our well-known top sellers and proven single-room ventilation units score once again - they support the ideal ventilation of smaller offices and apartments and, in addition, are energy-efficient. The heat of the room is largely retained. Find detailed information here:
