REFERENCE

BLAUBERG
LIVING, WORKING, ENJOYING – WITH BLAUAIR

Güntner

In this work-life-relevant lives and works a mix of students, commuters and business people. There are special suites and individually furnished microapartments, with common rooms for cooking, learning and just spending time. Only a few highlights are the rooftop pool, a lounge, cinema, gym, and a sauna area. To even increase the biological factor of the sauna, the central ventilation unit BlauAir CHU 8000-HE was installed to provide enhanced air quality. A unique and great project, as we think!
